QUALITY FOR LIFE

Nurmi Neo – Posterior Walker

- Promotes an active, upright posture and natural movements
- Individually adaptable to different body heights and abilities
- Foldable and easy to transport
- "Grows with the child"

Nurmi Neo – Natural Walking

Nurmi Neo is a walking aid that is positioned behind the body, opening out into the walking direction. This promotes an upright posture and natural walking movements. Existing residual functions can be used and promoted efficiently. Together with its light weight and extra smooth rolling characteristics of the wheels, Nurmi Neo requires little effort for autonomous movement.

The Nurmi Neo walking aid offers a high degree of security thanks to its advanced stability, its reverse-roll locks and its optional anti-tipper device. Foldable and with a light weight of 5 kg, Nurmi Neo is easy to transport and store.

Nurmi Neo "grows with the child". Height-adjustable grip bars allow it to be easily adjusted to different body heights.

A large range of accessories for different requirements and medical conditions allow for versatile and long-term use.

Nurmi Neo: for natural movements and real mobility.
