## Power Add-On models for everyday life, trips and adventures.

Wheelchair users can now experience a new level of freedom without compromise. Klaxon Klick or Twist devices are small, light, compact, and suitable for travel and everyday use. The Innovative Linking System from Klaxon means it can connect in seconds, and the universal hub adapts to any rigid or folding wheelchair frames.

The Electronic Brake System is a unique feature. One touch of the brake lever is all it takes to stop the Klick or Twist (in front mount with handlebar only), without having to use the mechanical brake. During the EBS braking, the energy produced will be recovered and used to recharge the battery. The mechanical brake can still be activated by applying a greater force on the brake lever. The two braking systems will then merge in a single braking action.

# Discover the Twist

A game-changer. The Klaxon Twist is an innovative power-assist device for manual wheelchairs.

- Multi-configuration allowing you to connect via the front or rear
- The only power add-on unit that offers an option to support transitioning through environments
- Lightweight and manoeuvrable to accompany you on every journey
- Compact and elegant design

## Several possibilities of use

Twist engaged on the front for a relaxed and safe outdoor ride. Choose your speed with the Controller and move with your hands free. Connect the handlebar and go fast in total comfort! The rear-mounted Twist is ideal for indoor use.

## Quick and easy to connect

Twist can be connected and disconnected in seconds and in total autonomy. Twist is the solution for your independent mobility. Discover a new feeling of freedom without giving up the comfort of moving with your wheelchair.

## Stylish, technological and wireless

Connect your driving system via Bluetooth. Control and select the pre-settings directly from the Klaxon® App. Nothing stands between you and your freedom! Twist is cool and elegant, perfect for moving around in style.

## Safe and secure

Twist is made of high-quality materials and meets the requirements of innovation and technology. It is designed to accompany you at all times in complete safety and durability. Integrated LED lights to ensure visibility at night!

## Lightweight and manoeuvrable

Twist is agile. It rotates 360° and is ideal for narrow spaces. The integrated ergonomic handle makes it easy to hold and transport. We take care of every detail.

## Compact and transportable

Explore new destinations with Twist. Discover the pleasure of travelling like never before! Twist is compact and lightweight and can be carried and transported by car, train or plane.

## Suitable for all types of terrain

Twist overcomes everyday obstacles with ease. Manages climbs efficiently. When installed in the front it lifts the wheelchair's front wheels and allows you to move on all types of terrain.

## Linking System Klaxon®

The innovative linking system can be mounted on any type of wheelchair, rigid or folding. Expand the functionality without sacrificing manoeuvrability and lightness.

# Twist

## Specifications:

Material	Aluminium
Motor	36 V x 750 W brushless
Wheel	10" smooth tread tyre
Brakes	with Controller: Electronic Brake System with Handlebar: 150 mm Mechanical Brake
Driving speed	with Controller: Front drive: up to 6 km/h Rear drive: up to 10 km/h with Handlebar: up to 10 km/h
Battery Information	Lithium 36 V x 4 Ah (weight 1.5 kg) Charging time: approx. 2h
Range	approx. 20 km (at moderate speed, on flat terrain and with user weighing 70 kg)
Weight	7.5 kg (without battery)
Connection	Available options: Central Linking System Klaxon® Lateral Linking System Klaxon® Rear Linking System Klaxon®
Dimensions	Twist: W 15 cm x H 34 cm x D 31 cm with Handlebar: W 45 cm x H 94 cm x D 42 cm
Technologies	Downhill Speed Control (in Controller Mode), Intelligent Cruise Control (in Controller Mode), Electronic Brake System
Included accessories	Battery, Battery Charger, Frontal Light, Rear Light
Included services	Klaxon® App
Optionals	Controller, Handlebar, Additional battery

# Klick Power

## Specifications:

Material	Aluminium
Motor	48 V x 750 W brushless, all wheel
Wheel	14" smooth tread tyre
Display	Multifunction LCD, 5 Speed settings, walking pace, USB charging port
Dedicated Buttons	Adaptive Cruise Control, Electronic Brake System Reverse gear, Double mapping 'Sport' and 'Comfort'
Battery	Lithium 48 V x 5.8 Ah (weight 3.0 kg)
Handlebar	Aluminium, adjustable in height, depth and angle
Brakes	Dual Lever Brake 160 mm with EBS - Electronic Brake System
Size	W 50 cm x H 90 cm x D 40 cm
Connection	Klick Linking System Klaxon® (worldwide patented)
Weight	8.5 kg (battery excluded)
Range	About 50 km (at speed 1, on flat terrain and with user weighing 70 kg)
Included accessories	Battery 11 Ah with battery charger, reverse gear, LCD display, bell, foldable kickstand, splashguard

# Klick Race

## Specifications:

Material	Aluminium
Motor	48 V x 1500 W brushless, all wheel
Wheel	14" smooth tread tyre
Display	Multifunction LCD, 5 Speed settings, walking pace
Battery	Lithium 48 V x 11 Ah (weight 3.0 kg)
Handlebar	Aluminium, adjustable in height, depth and angle
Brakes	Dual Lever Brake 160 mm with EBS - Electronic Brake System
Size	W 50 cm x H 95 cm x D 40 cm
Connection	Klick Linking System Klaxon® (worldwide patented)
Weight	11.4 kg (battery excluded)
Range	About 50 km (at speed 1, on flat terrain and with user weighing 70 kg)
Included accessories	Battery 11 Ah with battery charger, reverse gear, LCD display, bell, foldable kickstand, splashguard

# Klick Monster

## Specifications:

Material	Aluminium
Motor	48 V x 1500 W brushless
Wheel	20" tyre XL
Display	Multifunction LCD, 5 Speed settings, cruise control, walking pace
Battery	Lithium 48 V x 11 Ah (weight 3.0 kg)
Handlebar	Aluminium, adjustable in height, depth and angle
Brakes	Dual Lever Brake 160 mm with EBS - Electronic Brake System
Size	W 50 cm x H 90 cm x D 50 cm
Connection	Klick Linking System Klaxon® (worldwide patented)
Weight	15.0 kg (battery excluded)
Range	About 40 km (at speed 1, on flat terrain and with user weighing 70 kg)
Included accessories	Battery 11 Ah with battery charger, reverse gear, LCD display, bell, foldable kickstand, splashguard

## Handlebar Options - Standard and Tetra

(Klick User Interface and Wheelchair Mounting Options)

### Standard Handlebar

The ergonomics of the Standard Handlebar is designed to facilitate the user during driving and the linking and unlinking of the device from the wheelchair. The controls are easy to access and intuitive. Complete control of the features is at the user's fingertips, thanks to the multifunction digital keypad, which also provides direct access to all the functions of the display menu.

### Tetra Handlebar

The Tetra Handlebar allows users to accelerate and brake by simply pressing the handlebar. Driving is easy and intuitive, even for people with reduced motor skills or strength. You can enable electronic braking when releasing the handlebar and adjust its intensity and also use this accessory with the HHC «Hill Holder» feature, developed to assist the user when restarting on hills. A complete range of 'TETRA' accessories allows for maximum customisation of the system to overcome reduced hand or upper limb function.

# Linking System Klaxon®

## Worldwide Patented

The innovative linking system connects to any hand bike of the KCLICK product range in seconds, allowing you to switch between your favourite Klick hand bikes with ease. The universal connection hub adapts to both folding and rigid wheelchair frames. Experience a new level of freedom without compromising the manoeuvrability and comfort of your manual wheelchair. ## The APEX Mobility Product Range

The APEX Mobility team continually research new products and global innovation, which is why we can provide the very best assistive technology equipment available in the Australian market today. Before any products are added to the APEX Mobility range, they are tested and trialled to make sure they meet all functional and quality requirements, plus regulatory standards for safety.

Products featured in this brochure are part of our dynamic range of quality assistive technology equipment. Most of these products are scripted/prescribed, which means they are customised to suit the specific needs of individual clients.

## Product Demonstrations & Trials

APEX Mobility does not have demo units available. In many cases, Dealers are offered subsidised pricing for units that they will hold for showroom display or trial use only.

### Dealers of Assistive Technology

Contact your APEX Mobility account manager to discuss your needs.

### Therapists
